SUMMARY:

As a Computer Science graduate with a strong foundation in the **MERN** stack, focused on building clean, responsive, and user-friendly web applications. Experienced in creating frontend interfaces using **React**, managing APIs, and developing backend features with **Node.js**, **Express**, and **MongoDB**. I enjoy working on real-world projects where I can turn ideas into functional and well-structured applications.

I learn quickly, adapt fast, and work well in collaborative environments. During my internship and personal projects, I gained hands-on experience in problem-solving, debugging, code merging, and delivering quality results. I am committed to improving my skills, writing clean code, and growing as a **full-stack developer**.

EDUCATION:

- **MERN Stack certification course**
  (CETPA Infotech private LTD) **(March 2025 – December 2025)**

- **Bachelor of Technology (BTech) in Computer Science and engineering**
  (MGM College of Engineering and Technology, Noida) **(August 2021 – may 2025)**

EXPERIENCE:

Software Engineer

ARM World Wide, Gurgaon **(April 2026 – Present)**

- Working as a Software Engineer, contributing to full-stack development by building scalable frontend applications and robust backend systems.
- Developed backend systems and dashboards using Node.js and Express.js, including API development,Authentication, data handling, and server-side logic.
- Engineered the Explore 42 dashboard, handling backend architecture along with frontend integration, and managing version control and deployments.
- Designed and developed backend architecture for the Baithak Studio project and Kimble project, focusing on core server-side functionality and ensuring smooth data flow and business logic implementation.
- Built websites using CMS platforms such as WordPress and Sitecore, delivering dynamic, scalable, and content-driven solutions.
- Developed a command-to-video generator application using Python to automate video creation workflows .
- Managed and updated backend data across multiple dashboards (TJC, Pluxee, TCN, TresVista), ensuring accuracy and consistency.
- Performed QA, debugging, and optimization to enhance system performance and reliability.

Frontend Developer
ARM World Wide, Gurgaon **(August 2025 – April 2026)**

- As a Frontend Developer, built responsive, user-friendly, and visually engaging web applications by transforming UI/UX designs into seamless digital experiences.
- Developed responsive web pages using React.js for projects like CG Global and Pantomath, ensuring performance and cross-browser compatibility.
- Collaborated with UI/UX designers and developers to implement pixel-perfect designs and improve user experience.
- Worked on multiple websites including Vayana Digital, Vayana Finserv, Atlas Vayana, and IFF, creating and updating pages using WordPress.
- Ensured quality assurance (QA) by performing thorough testing for functionality, design consistency, and responsiveness.
- Conducted research to improve webpage structure, content flow, and overall design effectiveness.
- Managed content updates such as investor data, product details, and digital assets through admin panels.

SKILLS

Technical Skills:

- **Programming Languages:** Python, JavaScript
- **Web Development:** HTML, CSS, JavaScript, React, Node.JS, Wordpress, Sitecore, Express JS, MongoDB, Bootstrap, Tailwind CSS, Redux, Wordpress, Docker
- **Tools:** Git, GitHub, VS Code, Replit, IntelliJ Idea, Jupyter, Postman, Gitlab
- **Operating Systems:** Windows, Linux, Ubuntu, Android
- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming (OOPS)

PROJECTS:

1. Netflix clone and firebase auth

- Built a functional Netflix-style clone using React, featuring Firebase Authentication for secure signup/login flows.
- Implemented dynamic UI components, routing, and real-time user state management to simulate OTT platform behaviour.
- Repository Link:- https://github.com/Shivamgaur01/Netflix-clone-with-firebase-auth

2. My personal Portfolio

- Developed a responsive personal portfolio website using React and Tailwind CSS, ensuring modern UI design, optimized performance, and seamless user experience across devices.
- Integrated Emailer JS to enable dynamic contact form functionality, allowing real-time email communication without backend infrastructure.
- Repository Link:- https://github.com/Shivamgaur01/My_portfolio

3. Movie Explorer

- Developed a movie discovery web app using React, integrating external APIs to fetch and display movie data dynamically.
- Implemented search, filtering, and responsive UI to improve information access and usability.
- Repository Link:- https://github.com/Shivamgaur01/movie_explorer

4. Expense trekker

- Created a personal finance tracking application with **React**, enabling users to add, categorize, and monitor expenses.
- Utilized state management and clean component structure to deliver a smooth, interactive user experience.
- Repository Link:- https://github.com/Shivamgaur01/Expense-trekker

5. React Website Form

- Developed a responsive multi-section form application using **React + Vite**, implementing component-based architecture and state management best practices.
- Enhanced user experience through clean UI design, validation handling, and optimized rendering performance.
- Repository Link:- https://github.com/Shivamgaur01/React_website_form
