PROFESSIONAL SUMMARY

Software Engineer with 1+ year of experience in **full-stack web development** using the **MERN stack** (MongoDB, Express.js, React.js, Node.js). Proficient in building responsive web applications, **RESTful APIs**, **JWT authentication** and **role-based access control (RBAC)**. Experienced with **PHP/Laravel**, **WordPress** and **Sitecore** CMS, and in website maintenance, debugging, **page speed optimization** and **SEO**. Strong in Git version control, QA testing and collaboration with cross-functional teams to deliver scalable, high-quality solutions.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Python, PHP, SQL, HTML5, CSS3
- **Frontend:** React.js, Redux, Tailwind CSS, Bootstrap, Responsive Web Design
- **Backend & Database:** Node.js, Express.js, Laravel, MongoDB, SQL, REST API Development, JWT Authentication, RBAC
- **CMS & Optimization:** WordPress, Sitecore, SEO, Page Speed Optimization, Performance Optimization
- **Tools, Cloud & Practices:** AWS, Git, GitHub, GitLab, Docker, Postman, VS Code, IntelliJ IDEA, Debugging, QA Testing

PROFESSIONAL EXPERIENCE

ARM World Wide, Gurgaon — Software Engineer

April 2026 – Present

- Develop scalable full-stack applications and dashboards using Node.js, Express.js, React.js and MongoDB, covering API development, authentication, data handling and deployments.
- Engineered the **Explore 42 dashboard** end to end, including backend architecture, frontend integration and version control; designed backend logic for the **Kimble** project.
- Maintain and optimize **pluxee.in** and the **Finnable** project through ongoing maintenance, debugging, error resolution and performance improvements; manage backend data across **TJC**, **Pluxee**, and **TresVista** dashboards for accuracy and consistency.
- Delivered **Unicharm** projects (**sofy.in**, **lifree.co.in**, **mamypoko.co.in**): new category pages, page re-development, frontend and backend debugging and error resolution, page speed optimization and SEO optimization.
- Analysed **bajajamc.com** website and discussed key technical factors and solutions directly with the client to improve website overall performance.
- Built dynamic, content-driven websites on **WordPress** and **Sitecore (ph.sodexo.com)**, and contributed to **PHP and Laravel** projects.
- Developed a **Python command-to-video generator** to automate video creation workflows.

ARM World Wide, Gurgaon — Frontend Developer

August 2025 – April 2026

- Built responsive, cross-browser compatible web applications in **React.js** for **CG Global** and **Pantomath**.
- Developed new pages from scratch for **Vayana Digital** and **IFF**, and updated pages for **Vayana Finserv** and **Atlas Vayana** in **WordPress**, implementing pixel-perfect UI/UX designs.
- Performed **QA testing** for functionality, design consistency and responsiveness; managed content updates through admin panels.

PROJECTS

- **Task Manager Application (RBAC)** – Built from scratch for ARM World Wide with **three-tier role-based access control** (Admin, Manager, Employee) for secure task management and permission-based access.
- **Baithak Studio** – Designed the backend architecture and server-side functionality for ARM World Wide, ensuring smooth data flow and accurate business logic.
- **Aizen Website** – Developed a fully responsive website from scratch using **React.js** with reusable, component-based architecture.
- **Netflix Clone** – Built an OTT-style web app with **React**, **Firestore Authentication** for secure signup/login, routing and user state management.

EDUCATION

B.Tech, Computer Science & Engineering — MGM College of Engineering and Technology, Noida

Aug 2021 – May 2025

MERN Stack Certification — CETPA Infotech Pvt. Ltd.

Mar 2025 – Dec 2025
